

tSQLt Tests: Unit Test Your SQL Server Code and Sleep Better

Andy Jones
@SQLBits
#tSQLt

Why?

- Robust Code
- Automate
- Save Money
- Improve Reputation
- Senior Position
- Enjoyable
- DevOps

Agenda

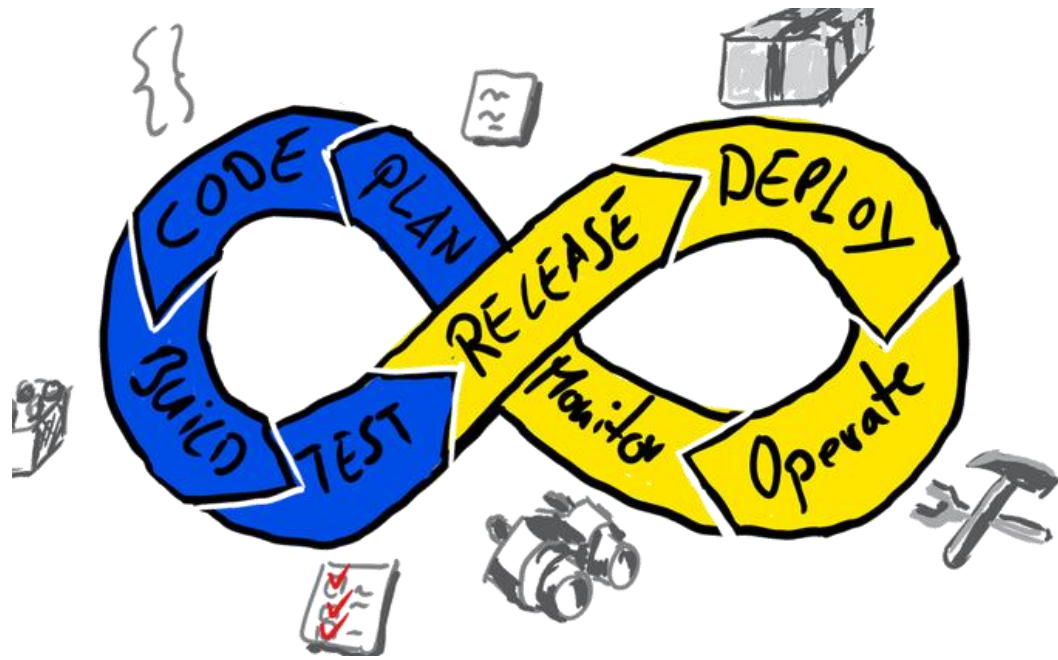

Unit Testing

Test Driven Development

tSQLt

Faking and Isolation

Third Party Tools

DevOps

“DevOps is the union of people, process, and products to enable continuous delivery of value to our end users”

Sam
Guckenheimer

DevOps

11.7 seconds

Testing?

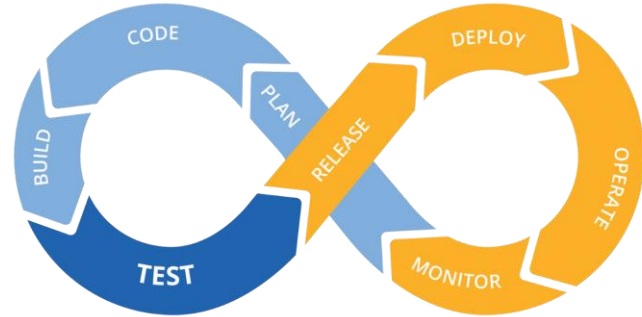

Senior developer:
"How do you test
your code?"

Junior developer:
"I compile it"

Database Release Spectrum

Typical Process

Could not find stored procedure 'dbo.InsertOrder'

Invalid column name 'TeamMember'

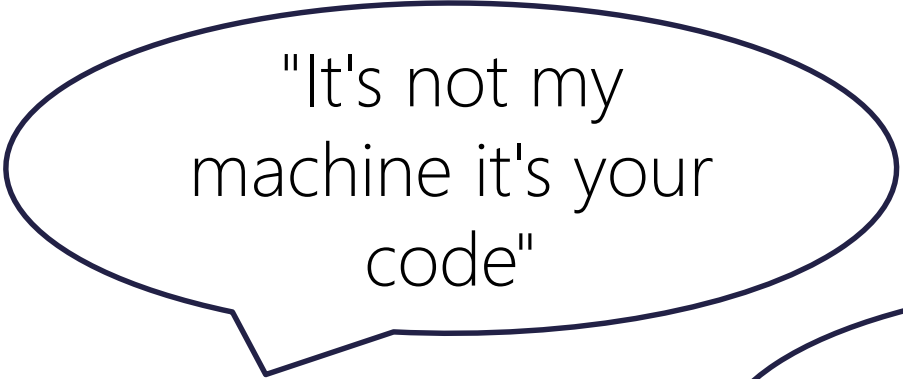

Procedure or function 'CustomerSelect' expects parameter '@Active', which was not supplied

Operand type clash: datetime2 is incompatible with int

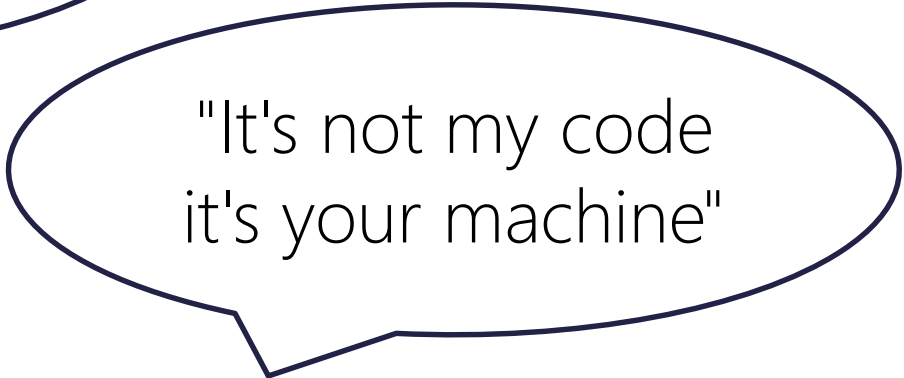

The INSERT statement conflicted with the FOREIGN KEY constraint

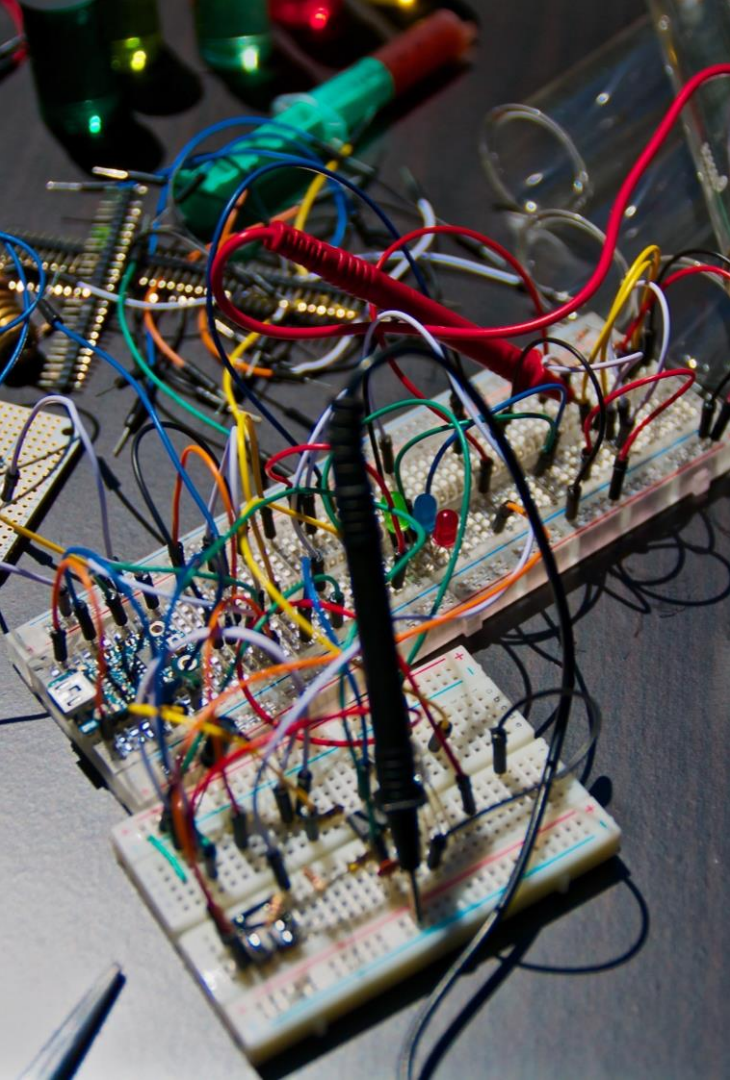

Blame

"It's not my
machine it's your
code"

"It's not my code
it's your machine"

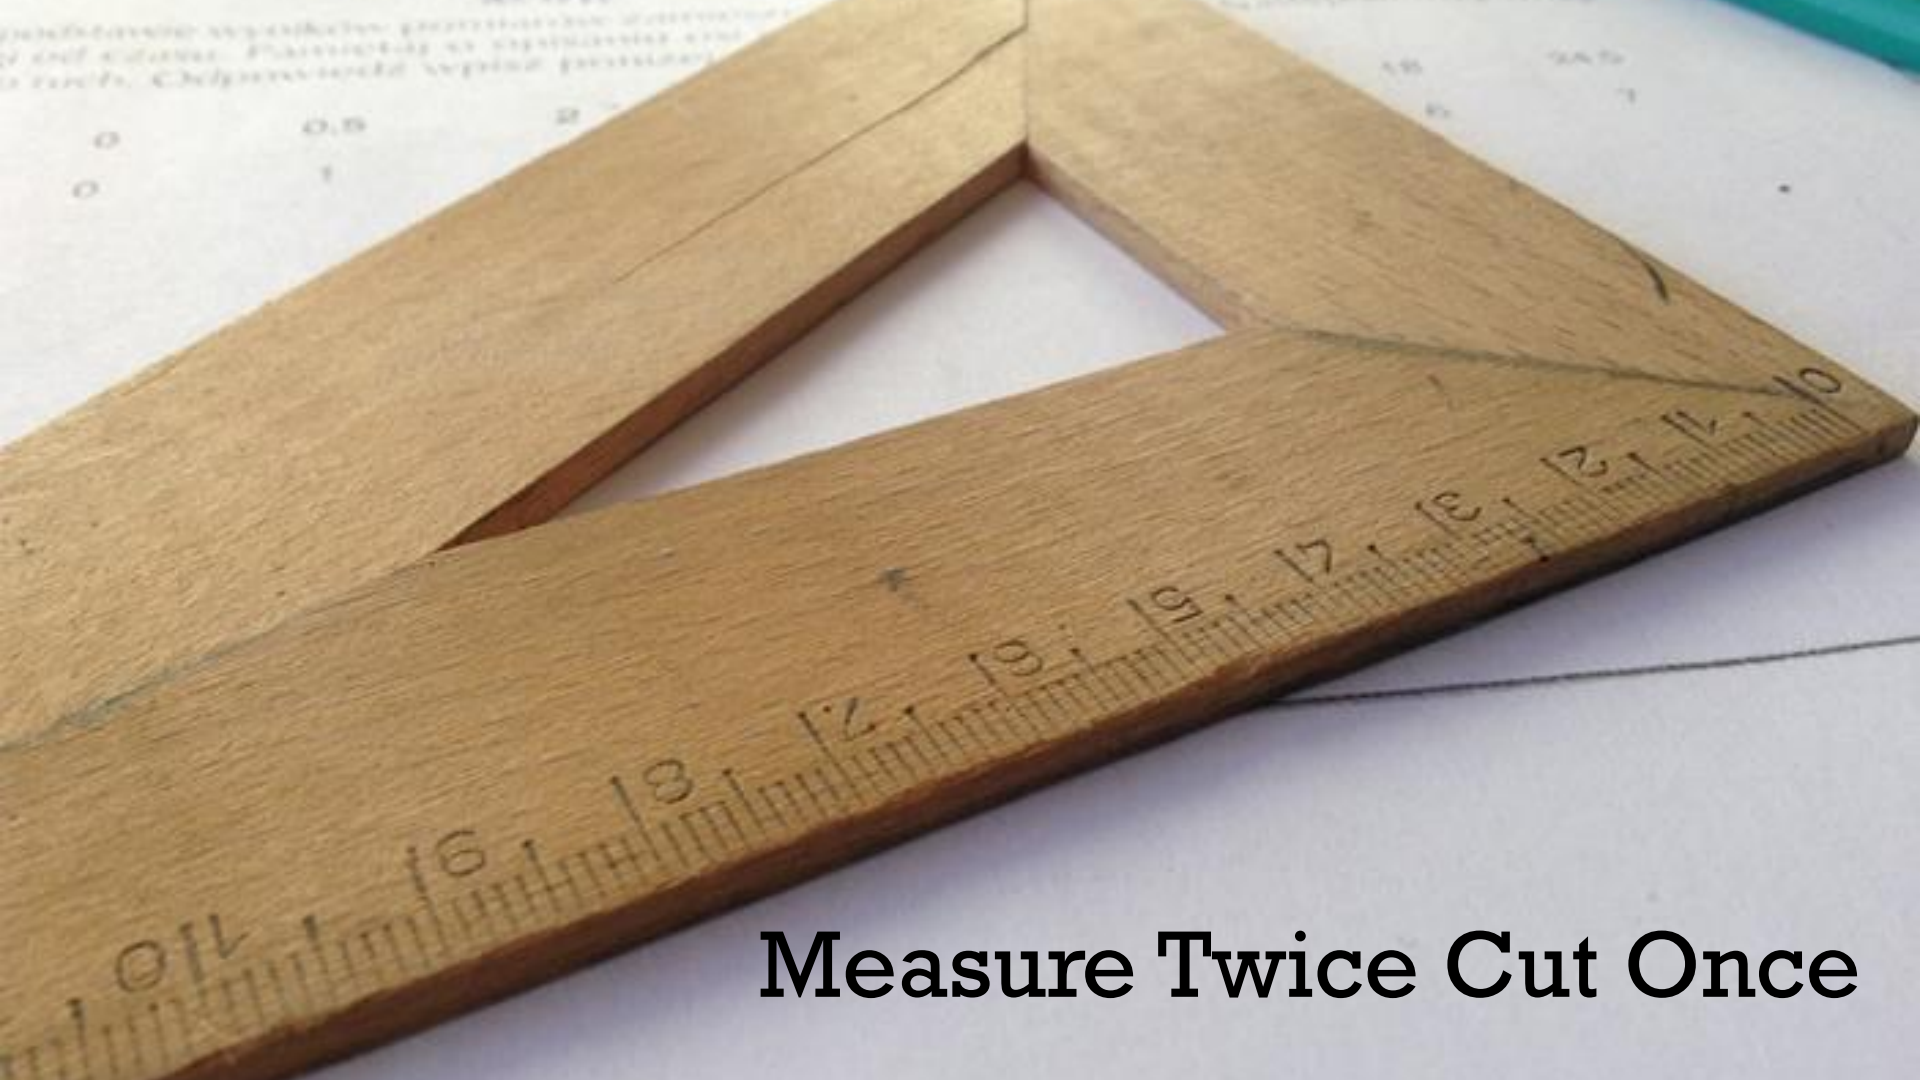

Unit Testing

- Same Language
- Smallest Unit
- Isolated
- Any Order
- Repeatable
- Each Test Every Time
- Automated
- Remove Human Error
- Familiar to Devs JUnit | xUnit | Pester

Test Driven Development

Measure Twice Cut Once

tSQLt

- Open source on GitHub
- Free
- 2005 and up
- Framework and tests are TSQL
- Independent via transactions
- Methods to fake objects and isolate

WELCOME TO TSQLT – THE DATABASE UNIT TESTING FRAMEWORK FOR SQL SERVER

On this website you will find the information necessary for installing and using tsQLt. Also, you can click on the Articles link on the menu above for more information on database quality.

WHAT IS TSQLT?

tsQLt is a database unit testing framework for Microsoft SQL Server. tsQLt is compatible with SQL Server 2005 (service pack 2 required) and above on all editions.

MAIN FEATURES

tsQLt allows you to implement unit tests in T-SQL. This is important as you do not have to switch between various tools to create your code and your unit tests. tsQLt also provides the following features to make it easier to create and manage unit tests:

- Tests are automatically run within transactions – this keeps tests independent and reduces any cleanup work you need

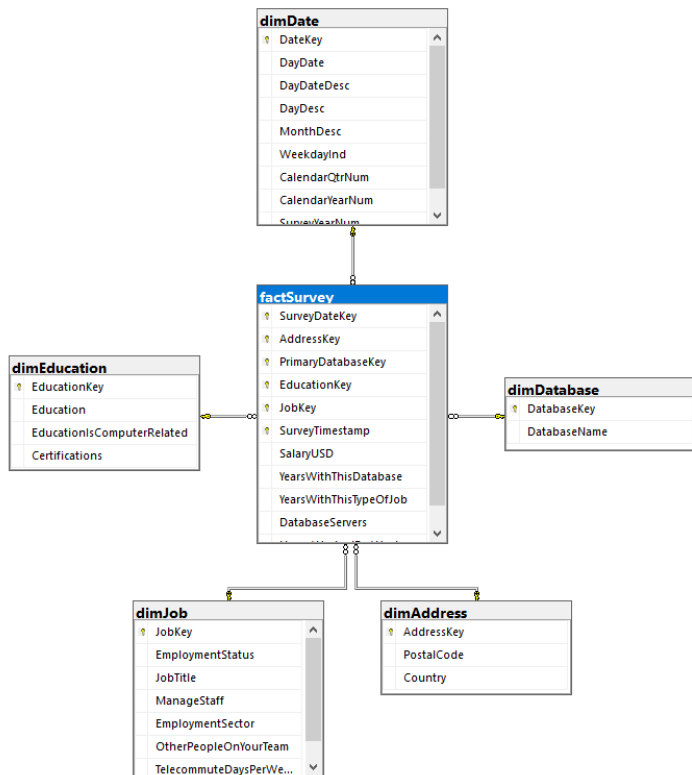

Enable CLR

SetClrEnabled.sql

```
EXECUTE sp_configure 'clr enabled', 1;  
RECONFIGURE;  
GO
```

Star Schema

Demo – Create Our First Test

Test Structure

Assemble

Fake Table

Fake
Function

Fake View

Spy
Procedure

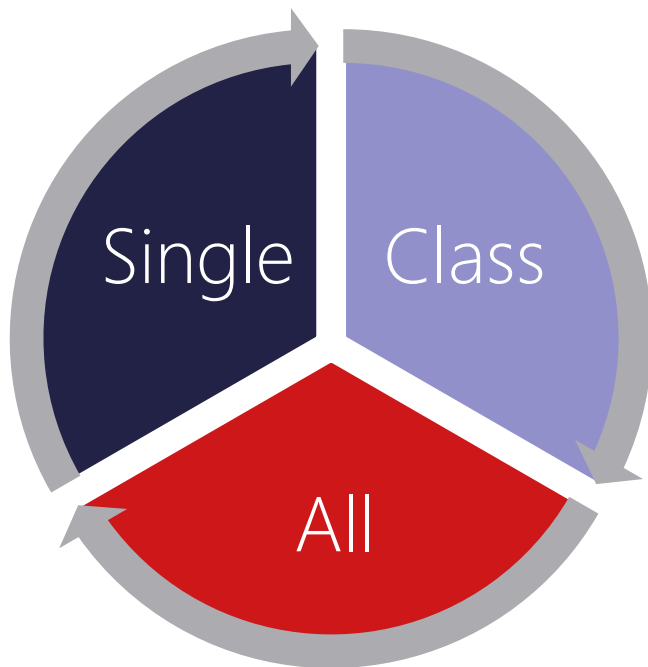

Act

```
--Act: Call the Get_Unknown_Key function  
SELECT @Actual = dbo.Get_Unknown_Key();
```

Assert

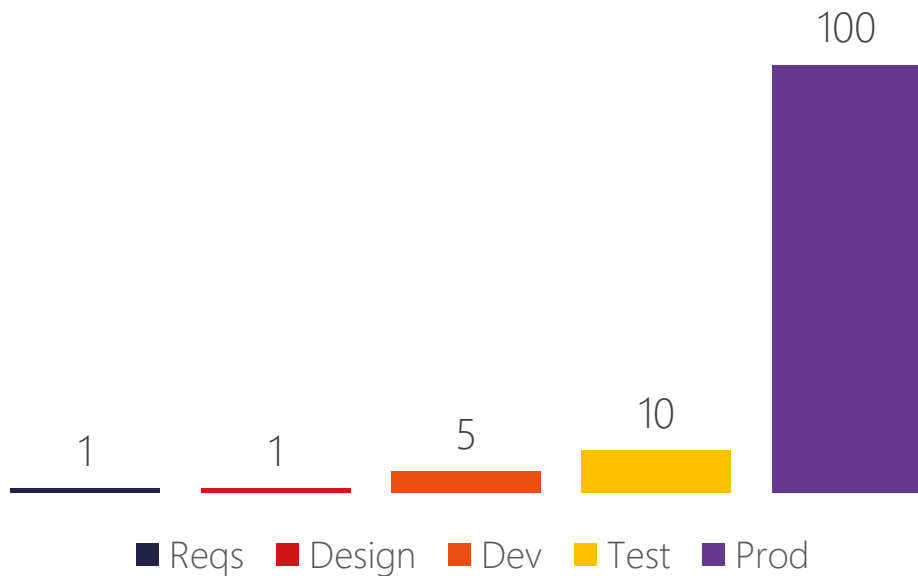

- AssertEmptyTable
- AssertEquals
- AssertEqualsString
- AssertEqualsTable
- AssertEqualsTableSchema
- AssertLike
- AssertNotEquals
- AssertObjectDoesNotExist
- AssertObjectExists
- AssertResultSetsHaveSameMetaData
- Fail

Running Tests

Prod Bugs Cost You 100x

Which SP Are Tests

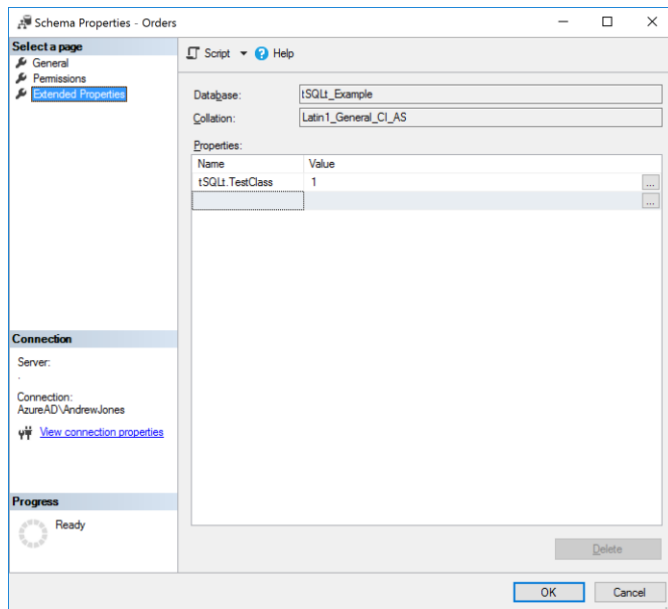

Naming Convention

```
EXECUTE tSQLt.NewTestClass  
    @ClassName = 'Orders';
```

```
CREATE PROCEDURE Orders.[test Failed Order]  
AS  
  
    --assemble  
    --act  
    --assert  
    RETURN;
```

Extended Property

tSQLt.TestClasses

```
CREATE VIEW tSQLt.TestClasses
AS
    SELECT s.name AS Name, s.schema_id AS SchemaId
    FROM sys.extended_properties ep
    JOIN sys.schemas s
    ON ep.major_id = s.schema_id
    WHERE ep.name = N'tSQLt.TestClass';
```

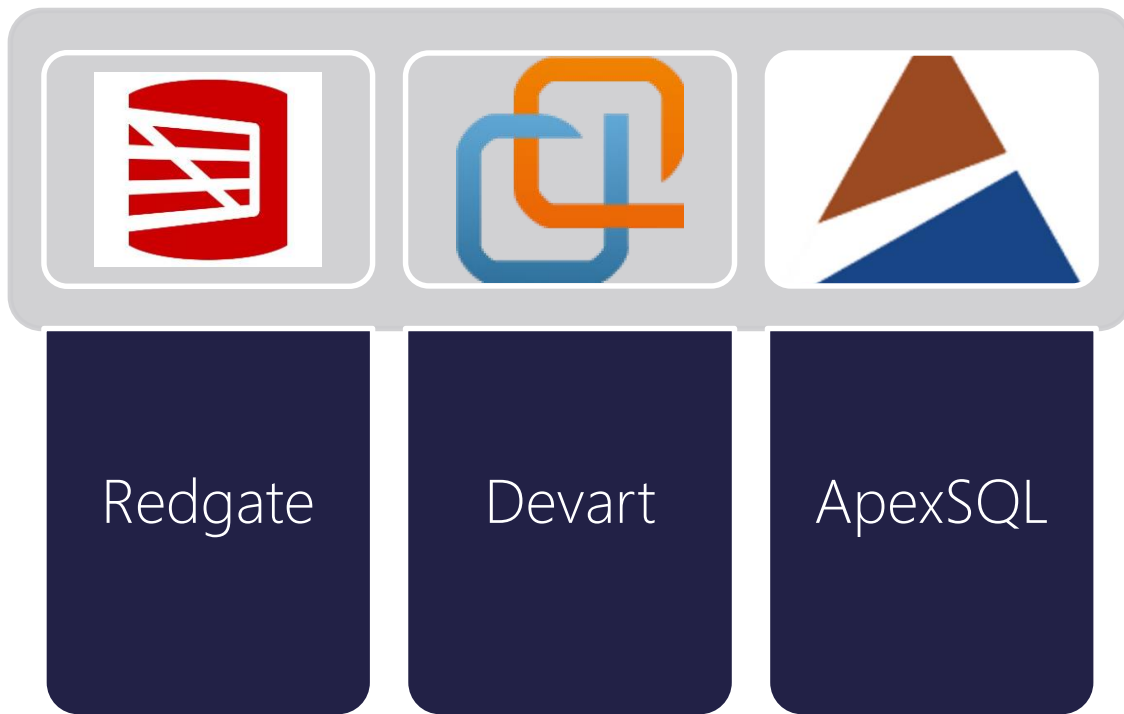

tSQLt.Tests

```
CREATE VIEW tSQLt.Tests
AS
    SELECT classes.SchemaId, classes.Name AS TestClassName,
           procs.object_id AS ObjectId, procs.name AS Name
    FROM tSQLt.TestClasses classes
    JOIN sys.procedures procs ON classes.SchemaId = procs.schema_id
    WHERE LOWER(procs.name) LIKE 'test%';
```

Standards

Code Coverage

“Testing can be used to show the presence of bugs, but never to show their absence”

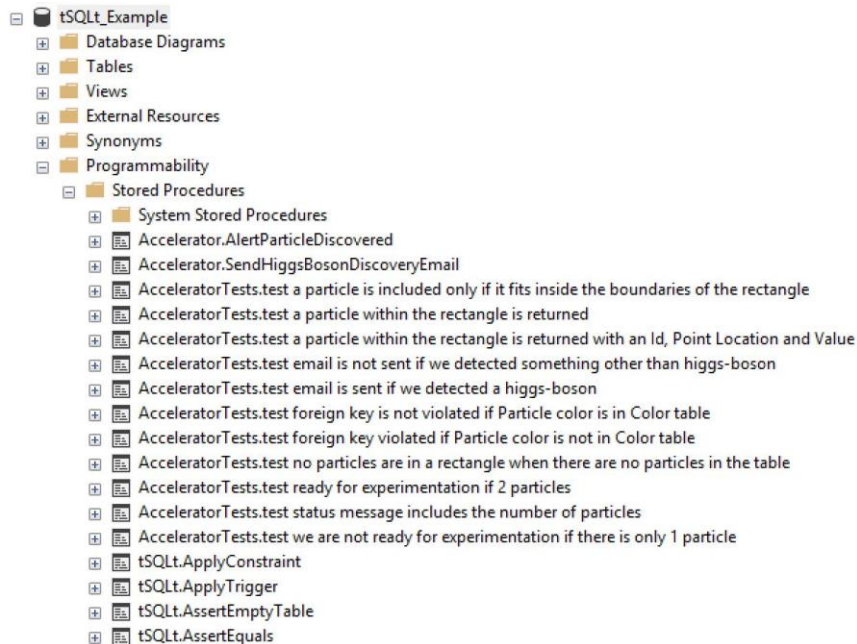

Edsger W. Dijkstra

Summary

- Robust
- Find bugs early
- Automated
- Shared
- Repeatable
- Better you

Example Database

Call To Action

*“The best time to plant
a tree is twenty years
ago. The second best
time is now”*

Chinese Proverb

Just like Jimi Hendrix ...

We love to get feedback

**Please complete the session feedback
forms**

SQLBits - It's all about the community...

Please visit Community Corner, we are trying this year to get more people to learn about the SQL Community, equally if you would be happy to visit the community corner we'd really appreciate it.

Thanks
