The Azure Data Landscape

DATA → STORAGE → INTELLIGENCE → ACTION

Solution Scenarios

Big Data & Advanced Analytics

Modern Data Warehousing

"We want to integrate all our data including 'big data' with our data warehouse"

Real-Time Analytics

"We are trying to get insights from our devices in real-time, etc."

Advanced Analytics

"We are trying to predict when our customers churn."

Uses of Data

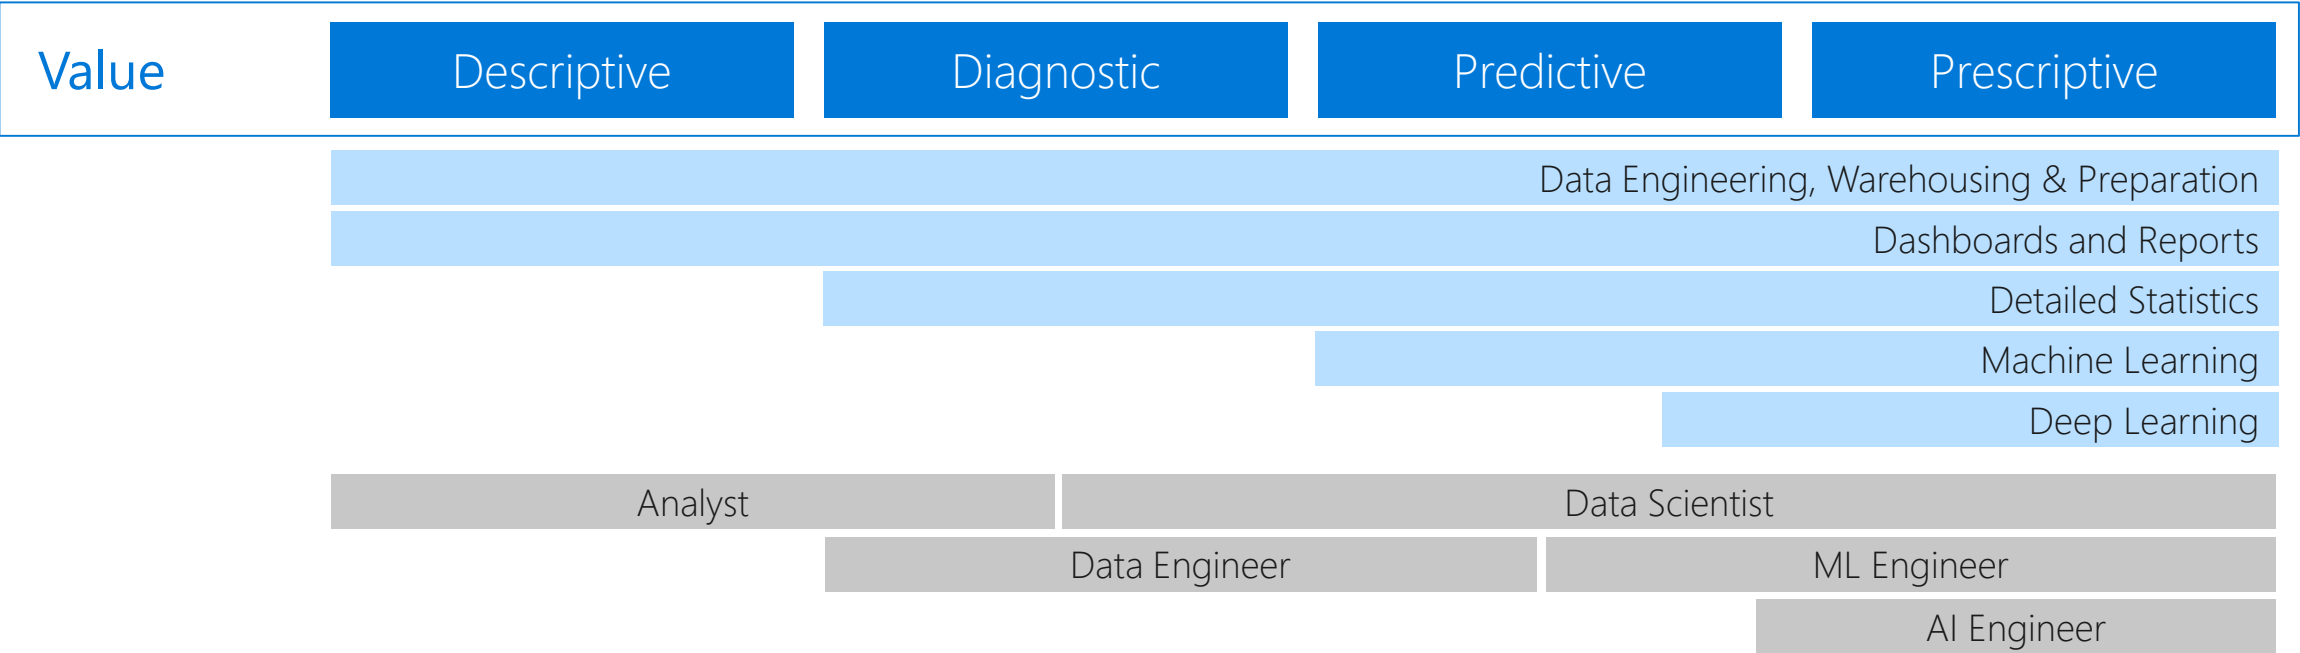

BI

AA

AI

Modern Data Warehousing

The Modern Data Warehouse extends the scope of the data warehouse to serve “big data” that is prepared with techniques beyond relational ETL.

Modern Data Warehousing

“We want to integrate all our data including ‘big data’ with our data warehouse”

Real-Time Analytics

“We are trying to get insights from our devices in real-time, etc.”

Advanced Analytics

“We are trying to predict when our customers churn.”

MODERN DATA WAREHOUSING

CANONICAL OPERATIONS

Load & Ingest

TRANSFER, STORE

Process

PROCESS, CLEAN

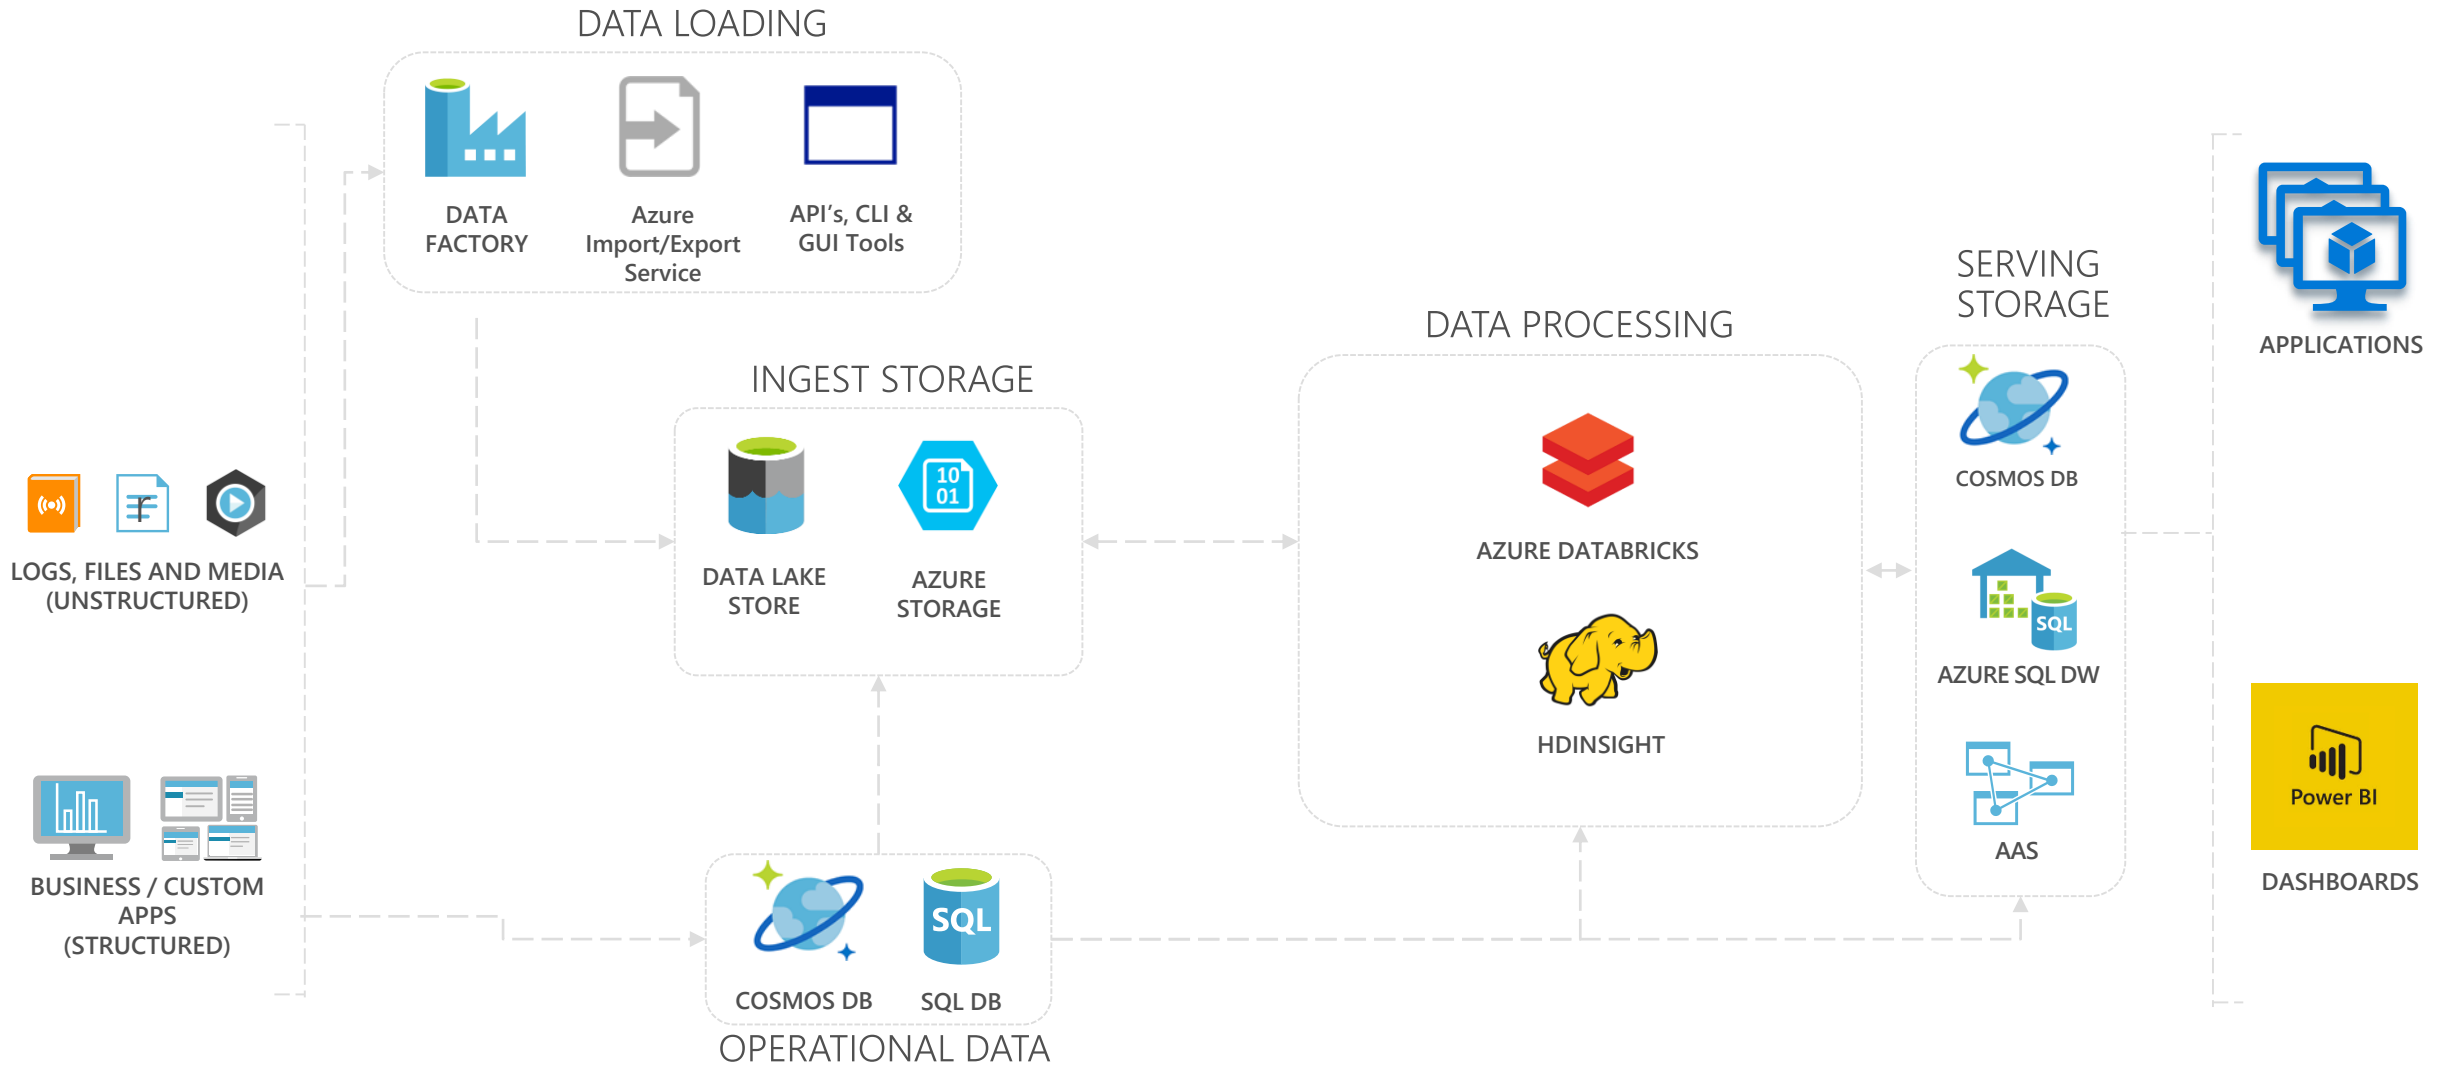

Serve

SERVE, ANALYZE

DATA WAREHOUSING PATTERN IN AZURE

Loading and preparing data for analysis with a data warehouse

Real-Time Analytics

Real-time Analytics (aka Stream Analytics) is the phenomenon of processing data as soon as it is generated, to derive very quick analysis/insight for timely action.

Modern Data Warehousing

"We want to integrate all our data including 'big data' with our data warehouse"

Real-Time Analytics

"We are trying to get insights from our devices in real-time, etc."

Advanced Analytics

"We are trying to predict when our customers churn."

STREAMING - CANONICAL OPERATIONS

Ingest

CONNECT, COLLECT, STORE

Analytics

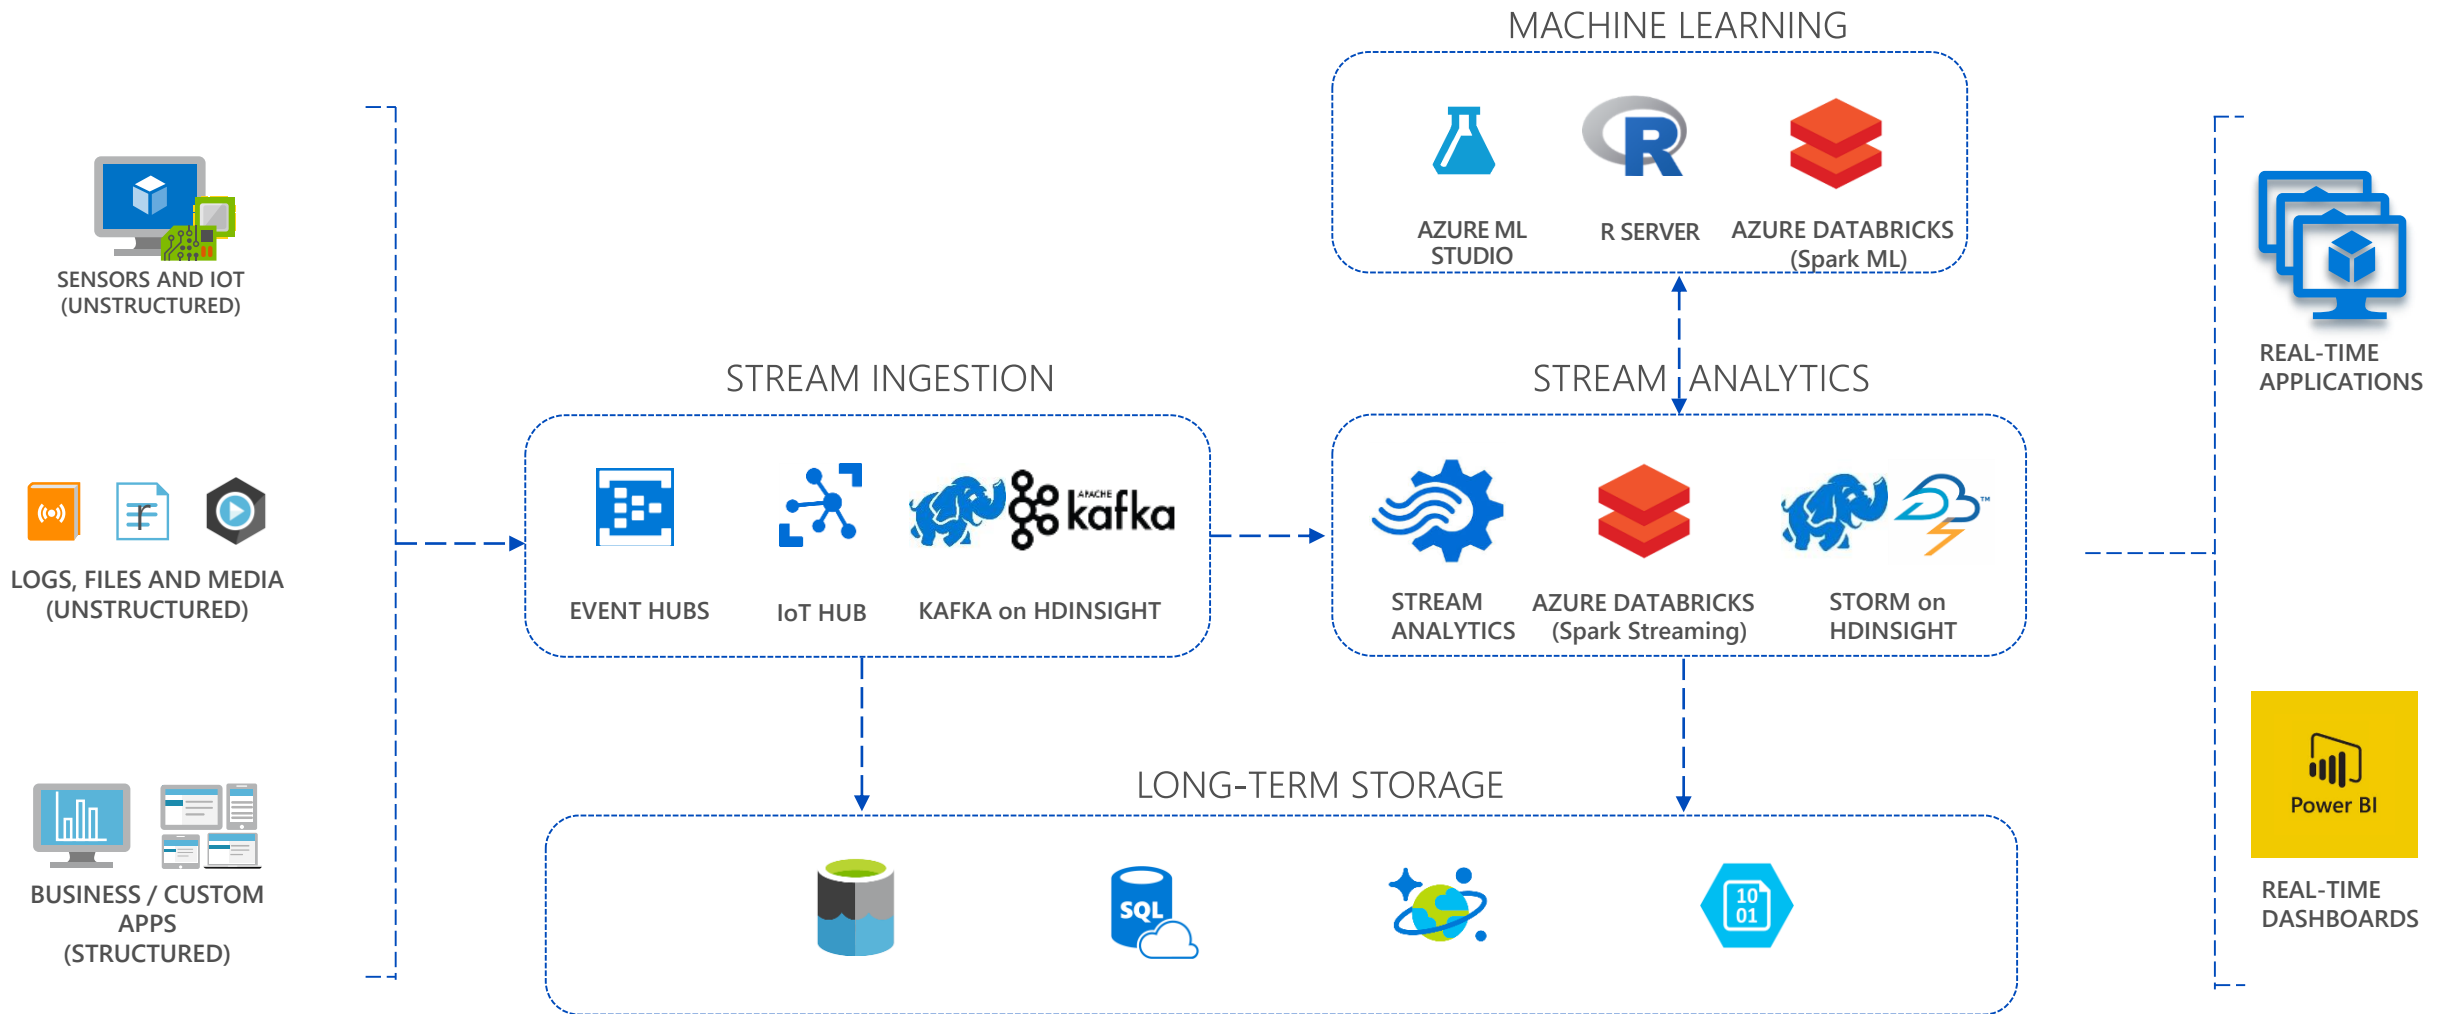

PROCESS, ANALYZE

Actions

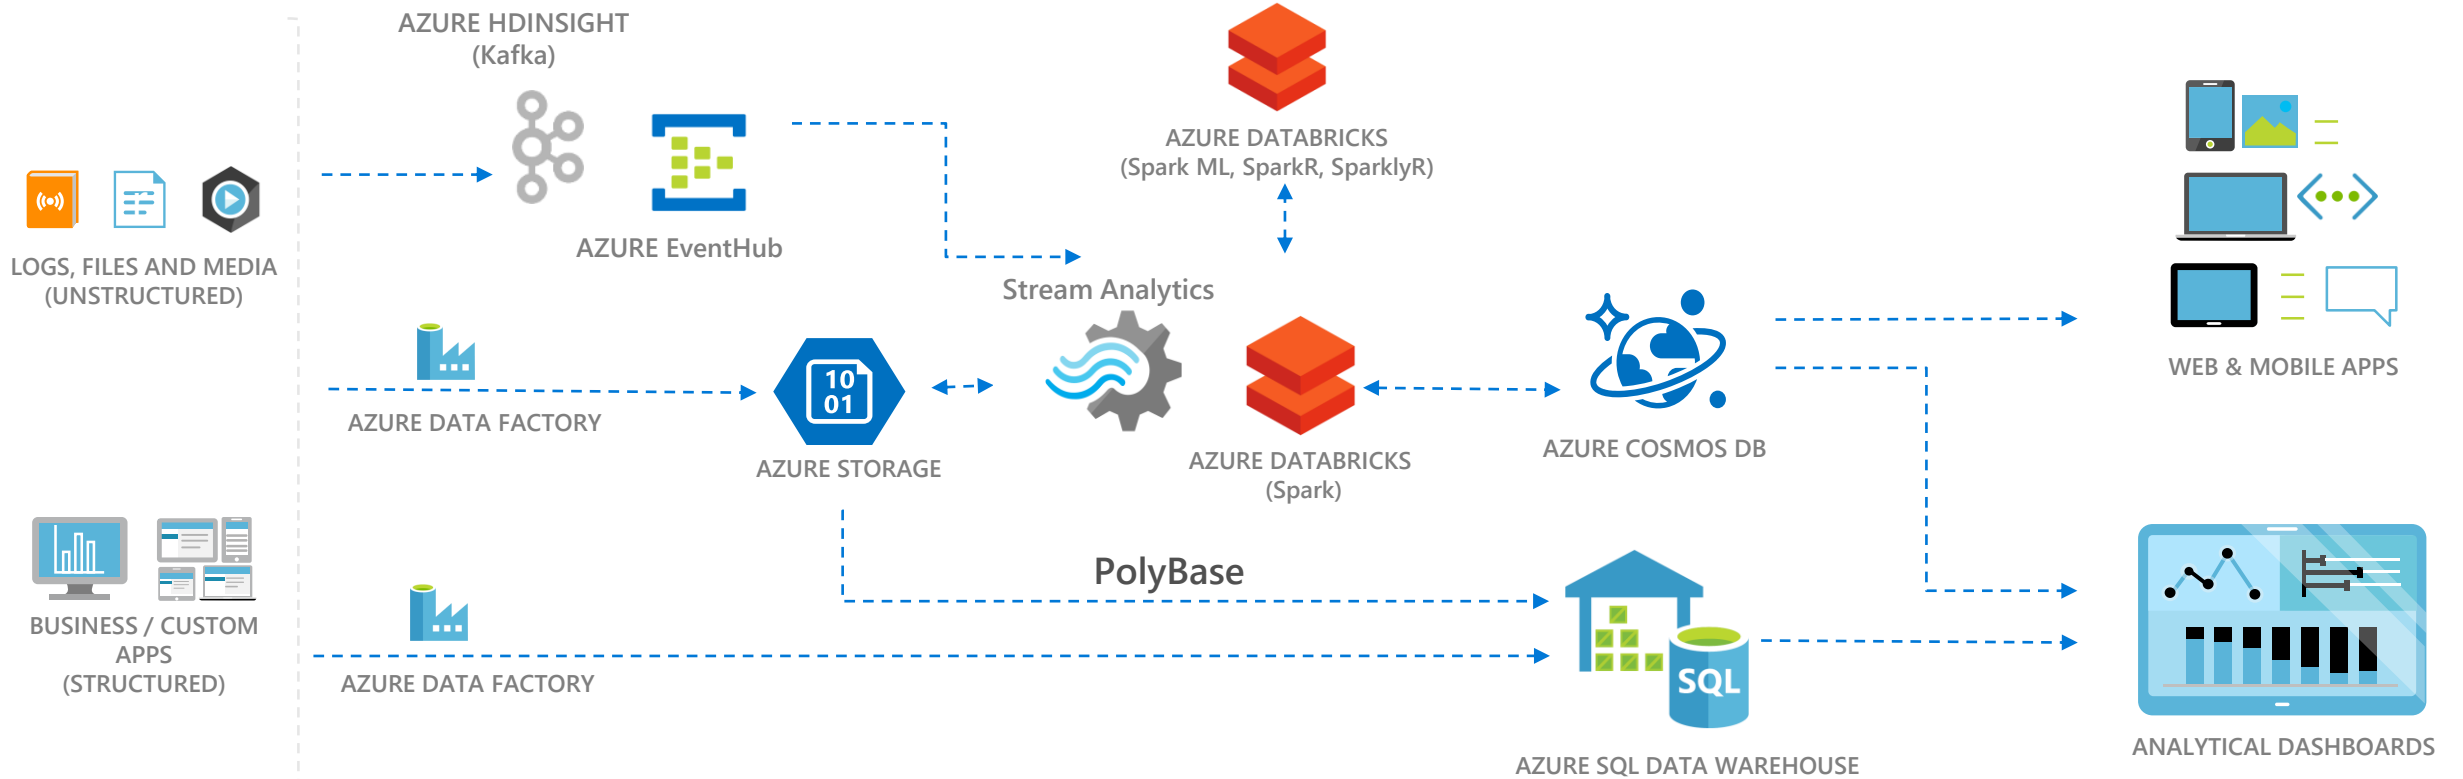

REPORT, VISUALIZE, ACT

BIG DATA STREAMING PATTERN WITH AZURE

DATA WAREHOUSING PATTERN IN AZURE

Big Data Lambda Architecture

Advanced Analytics

Advanced Analytics is the process of applying machine learning and/or deep learning techniques to data for the purpose of creating predictive/prescriptive insights.

Modern Data Warehousing

"We want to integrate all our data including 'big data' with our data warehouse"

Real-Time Analytics

"We are trying to get insights from our devices in real-time, etc."

Advanced Analytics

"We are trying to predict when our customers churn."

ADVANCED ANALYTICS-CANONICAL OPERATIONS

Data Acquisition & Understanding

ACQUIRE, UNDERSTAND

Modeling

TRAINING, VALIDATION

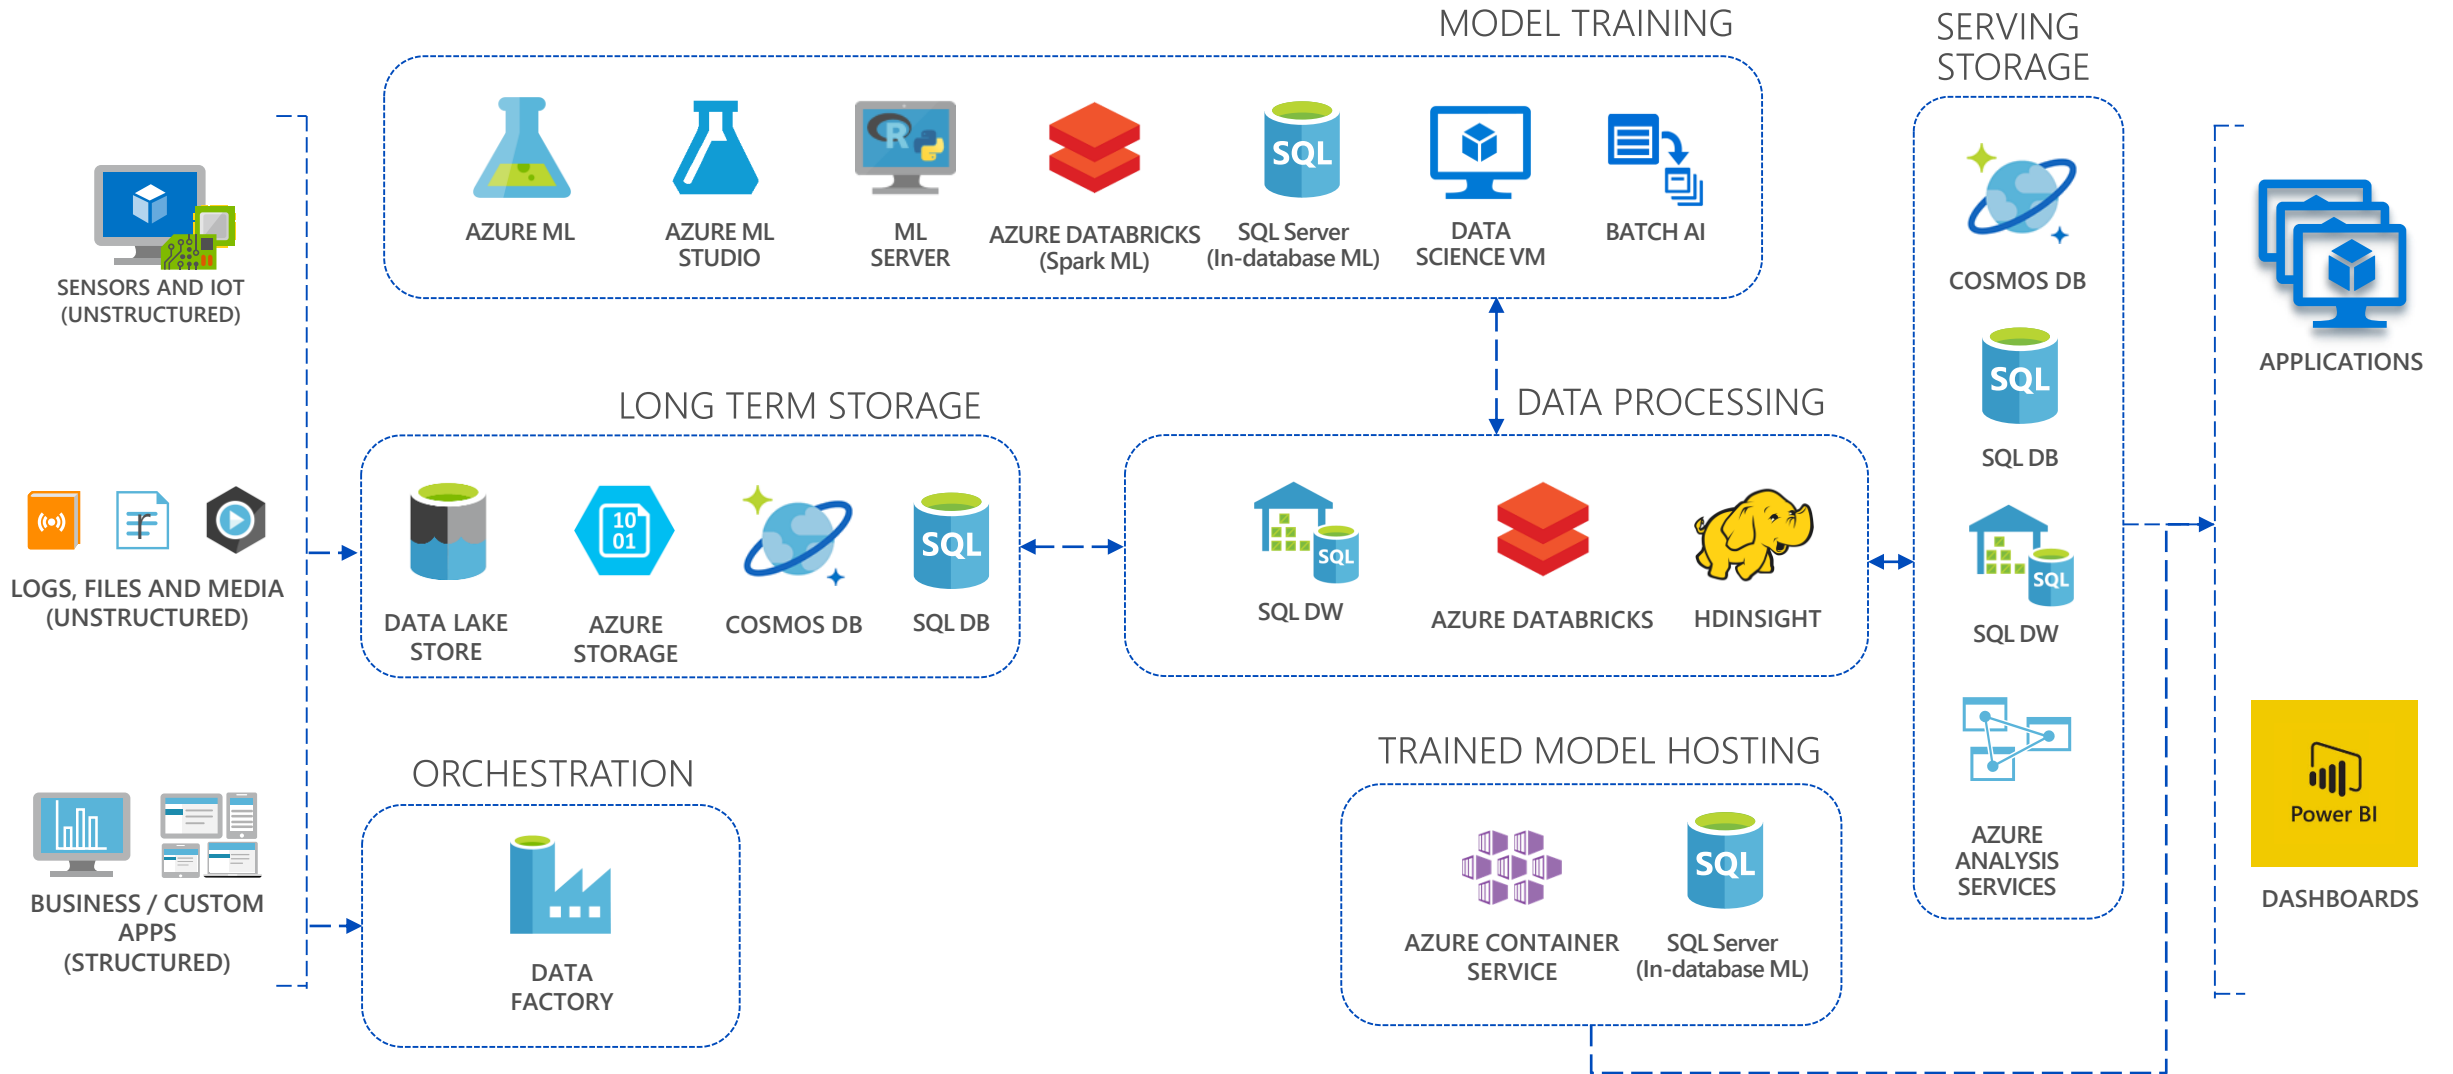

Deployment

DEPLOY, INTEGRATE

ADVANCED ANALYTICS PATTERN IN AZURE

Performing data collection/understanding, modeling and deployment

DEMO

THINGS TO NOTE

- There are no right or wrong solutions, only optimal solutions
- We lead with certain solutions and customise based on customer scenarios
- Customer voice and product and service maturity govern lead solutions
- Consider price and performance, ease of use, and ecosystem acceptance as factors
- Everything is fluid - a lead solution today might be non-optimal tomorrow, based on the factors above and new releases

Decision Points

IaaS	PaaS	SaaS

Customer:

- ☐ Regionality
- ☐ VNET requirements
- ☐ Speed of business

- ☐ Data Volumes
- ☐ Data Types
- ☐ Governance
- ☐ Team
- ☐ Skills
